## SENSITIVE AREAS: INTRODUCTION

This section is intended for use by the On-Scene Coordinators during the initial phase of a spill event to assist in ascertaining the location and presence of spill-sensitive biological and cultural resources, services, and users in the Southeast Alaska Subarea. This information is specific to the Southeast Alaska Subarea and was compiled by a multi-organization Sensitive Areas Work Group. No attempt has been made to duplicate information contained in easily accessible existing documents. This section, therefore, must be used in conjunction with the referenced materials and informational contacts identified herein. More detailed and current data should be available from on-scene resource experts when they become engaged in the response. This information is geared toward early response. If appropriate, natural resources trustees may be conducting natural resource damage assessment (NRDA) activities in conjunction with response activities. Information regarding NRDA activities should be directed to the natural resources trustees or to their appointed NRDA Liaison.

Often, the most detailed, up-to-date biological and resource use information will come from people who live and work in the impacted area. People from the local community are often knowledgeable sources for information related to fishing, hunting, non-consumptive outdoor sports, and subsistence use. They may also have a good idea of which spill response techniques (especially exclusion and diversion booming) are practicable under prevailing weather and current conditions.

The Alaska Regional Response Team (ARRT) has adopted a series of guidelines (see the Alaska Federal/State Contingency Plan for Response to Oil & Hazardous Substance Discharges/Releases (Unified Plan)) covering decision processes to protect sensitive areas. These guidelines and tools are not duplicated here:

- Application of dispersants (see Annex F, Appendix 1: RRT Oil Dispersant Guidelines for Alaska).
- Use of *in situ* burning (see Annex F, Appendix 2: *In Situ* Burning guidelines for Alaska).
- Protection of wildlife (see Annex G, Appendix 1: Wildlife Protection Guidelines for Alaska).
- Consultation on threatened and endangered species (see Annex G, Appendix 2: Inter-agency Memorandum of Agreement Regarding Oil Spill Planning and Response Activities Under the Federal Water Pollution Control Act National Oil and Hazardous Substances Pollution Contingency Plan and the Endangered Species Act).
- Protection of historic properties (see Annex M: Alaska Implementation Guidelines for Federal On-Scene Coordinators for the Programmatic Agreement on Protection of Historic Properties during Emergency Response under the National Oil and Hazardous Substances Pollution Contingency Plan).
- Also in the Unified Plan, the National Oceanic and Atmospheric Administration Scientific Support Coordinator has developed a Shoreline Countermeasures Manual which provides helpful information on clean-up options by shoreline type (see Annex N: Shoreline Cleanup and Assessment Guidelines).

Section G of the Subarea Contingency Plan contains site-specific Geographic Response Strategies (GRSs) for use by responders in protecting key sensitive areas. In addition, Environmental Sensitivity Index (ESI) maps have been produced that illustrate selected sensitive resources and shoreline types.

This section and the guidelines in the Unified Plan are also intended for use by facility/vessel operators in developing industry oil spill prevention and contingency plans. For an operator's facility or area of operation, industry contingency plans describe: (a) environmentally sensitive areas of public concern; (b) how sensitive areas would be prioritized during a spill event; and (c) response strategies to protect sensitive areas at risk. This information within industry plans should be consistent with subarea plans.

The definition of sensitive resources and their geographic locations requires use of field observations and data available from published and non-published materials or through additional field work. With the limited time and funds available for Subarea Contingency Plan development (there are ten such plans covering the state of Alaska), not all the detailed information necessary to adequately complete the Sensitive Areas Section was compiled. Identifying relative priorities among resources and resource uses takes considerable coordination and discussion among resource management agencies.

Many of the maps presented in this section are available on-line through the Internet at:

<http://www.asgdc.state.ak.us/maps/cplans/subareas.html>

The joint Federal-State Subarea Contingency Plan for this subarea is scheduled to be updated periodically. Much can be done in these updates to improve the data and its presentation, such as:

- # Establish a continuing interagency mechanism to review, update and maintain sensitivity information and priorities.
- # Fund staff/materials to compile data and prepare materials for presentation in the Subarea Contingency Plans.
- # Subdivide the area into smaller geographic areas and identify more specifically sensitive seasonal biological and other resource locations.
- # Expand and further detail sensitive resources and initial response tactics for the most likely spill scenarios.

Suggestions, comments, and more current information are requested. Please contact either:

## SENSITIVE AREAS: PART ONE – INITIAL CONTACTS

[see Table at end of Part One for contact information]

| Agency   | Resources   | Primary Contact  | Alternate Contact  |
|--|---|------------------|--------------------|
| <b>FISH and WILDLIFE and HABITAT RESOURCES</b>   |   |                  |                    |
| Alaska Department of Fish and Game   | fish, shellfish, birds, terrestrial mammals, marine mammals   | Mark Fink        |                    |
| U.S. Department of the Interior  | migratory birds, sea otters, polar bears, walrus, endangered species, anadromous fish in freshwater, bald eagles, wetlands            | Pamela Bergmann  | Doug Mutter        |
| U.S. Department of Commerce, National Marine Fisheries Service, Alaska Region  | sea lions, seals, whales, endangered marine species, anadromous fish in marine waters, essential fish habitat                         | Brad Smith       | Jon Kurland        |
| U.S. Department of Commerce, National Marine Fisheries Service, Alaska Fisheries Science Center, Auke Bay Laboratory | effects of oil on fisheries resources, hydrocarbon chemistry, dispersants   | Jeep Rice        | Jeff Short         |
| U.S. Department of Agriculture   | national forest lands   | Scott Snelson    | Scott Fitzwilliams |
| Alaska Natural Heritage Program  | rare and endangered plants  | Julie Michaelson | Rob Lipkin         |
| <b>CULTURAL and ARCHAEOLOGICAL SITES</b>   |   |                  |                    |
| Alaska Office of History and Archaeology   | historic sites, archaeological sites, national register sites   | Dave McMahan     | Joan Dale          |
| U.S. Department of the Interior  | archaeological/historical sites in park and wildlife refuge system units, public lands, Native allotments/trust lands; sunken vessels | Pamela Bergmann  | Doug Mutter        |
| U.S. Department of Agriculture   | archaeological/historical sites on national forest lands  | Mark McCallum    | Scott Snelson      |
| <b>SHORELINE TYPES</b>   |   |                  |                    |
| NOAA Scientific Support Coordinator  | shoreline types, environmental sensitivity index maps   | John Whitney     |                    |
| <b>LAND OWNERSHIP and CLASSIFICATIONS/DESIGNATIONS</b>   |   |                  |                    |

| Agency  | Resources   | Primary Contact   | Alternate Contact   |
|---|---|---|---|
| Alaska Department of Natural Resources  | state lands, state parks and recreation areas, state forests, tidelands   | Doug Sanvik   | Sam Means   |
| Alaska Department of Fish and Game  | state game refuges, state critical habitats   | Mark Fink   |   |
| U.S. Department of the Interior   | national parks and preserves, national historic sites, national monuments, national wildlife refuges, public lands, national recreation areas, wild and scenic rivers, wilderness areas, Native trust lands | Pamela Bergmann   | Doug Mutter   |
| U.S. Department of Agriculture  | national forests, national monuments, wild and scenic rivers, wilderness areas, research natural areas  | Scott Fitzwilliams  | Scott Snelson   |
